

Dear FCC,

I think it's a shame that so many thousands of men have died protecting this country's beliefs and constitution. Now you are trying to make their deaths worthless. Howard Stern and satellite radio should be the least of your concerns with so many bigger problems this country faces. I am dissappointed in the double standard that you have with cable and radio. Opera & Bone get a pass and entertainment radio take the hit. Adults should be able to choose what they want to listen to and watch. Parents need to be parents and not depend on governement to due the job. If you don't like it turn the station. The market place will decide want the people want!

Your witch hunt is an outrage and needs to stop.

Thank you,

David Zuhr
